Purpose | **Project Drivers**

**BE LIGHT
ON THE LAND**

Maintain natural granite bluffs, flora
& fauna and existing trails & climbing
areas.

**BE LIGHT
ON THE LAND**

Maintain natural granite bluffs, flora & fauna and existing trails & climbing areas.

**RESPECT LOCAL FORM +
CHARACTER**

Create a respectful building height and form to create an appropriate density for the site.

**BE LIGHT
ON THE LAND**

Maintain natural granite bluffs, flora & fauna and existing trails & climbing areas.

**RESPECT LOCAL FORM +
CHARACTER**

Create a respectful building height and form to create an appropriate density for the site.

**ADAPT TO SEASONAL
CHANGES**

Consider seasonal patterns that affect site circulation, parking and building form.

**BE LIGHT

Approach | **Site Considerations**

SITE | LOCATION

**Let the landscape
guide the
architecture—
minimize the building
footprint to honor
and protect the site's
natural beauty.**

Preserve the natural character and stability of the landscape.

Provide a single primary vehicle access from School Draw, located away from the Dettah Ice Road.

Promote a continuous pedestrian connection through the site, integrating with existing trail networks to enhance connectivity.

Provide a community amenity and park space that expresses regional culture and connects visually and physically to Yellowknife Bay.
